Mela Chundavilai, Karungal, Tamil Nadu, India

PROFESSIONAL SUMMARY

Passionate and self-driven Computer Science undergraduate with a strong foundation in software development, AI, Linux system administration, and automation. Experienced in building full-stack mobile and web applications using Flutter, Dart, Python, and modern web technologies. Adept at API integration, clean architecture patterns, and independent problem-solving. Seeking opportunities to apply technical skills in development, automation, and innovative projects.

EDUCATION

Bachelor of Engineering in Computer Science & Engineering

St. Xavier's Catholic College of Engineering (SXCCE), Anna University

2024 - 2028 | CGPA: 8.0

TECHNICAL SKILLS

Programming Languages: Python, C, Java, Dart, HTML, CSS, JavaScript

Frameworks & Libraries: Flutter, BLoC, Hive, Dio, REST APIs

Tools & Platforms: Git, GitHub, VS Code, Vercel, GitHub Pages, Bash/Shell

Operating Systems: Linux (Ubuntu, Fedora), Windows, GNOME Desktop Customization

Concepts: Clean Architecture, API Integration, State Management, FFI, Automation, AI/ML Basics

PROJECTS

Rhythmix - Music Streaming Application

Flutter, Dart, C++ FFI, BLoC, Hive, Dio | github.com/Naveen-kit/Rhythmix

- Built an industry-grade music streaming application with clean architecture (data/domain/presentation layers)
- Integrated C++ audio engine via FFI for high-performance audio processing and playback
- Implemented BLoC state management with separate blocs for player, search, library, equalizer, and downloads
- Developed features including playlist management, equalizer, synchronized lyrics, offline downloads, and queue management
- Integrated multiple remote APIs (JioSaavn, Deezer, iTunes, Last.fm, Jamendo, Audius) for music discovery and streaming
- Used Hive for local data persistence including downloads, playlists, and user settings

Trading App - Mobile Trading Platform

Flutter, Dart, REST APIs

- Developed a Flutter-based mobile trading application with real-time data visualization
- Integrated third-party APIs for live market data feeds and portfolio tracking
- Implemented interactive charts and data-driven UI components for trading insights

Spotify Clone - Music Streaming Web App

HTML, CSS, JavaScript, Vercel | github.com/Naveen-kit/song-uploader

- Built a feature-rich Spotify-inspired music streaming web app with audio upload and playback

- Designed a modern, responsive UI with smooth animations deployed on Vercel

Portfolio Website

HTML, CSS, JavaScript, GitHub Pages | naveen-kit.github.io/portfolio

- Designed and developed a personal portfolio with particle animations, interactive UI, and responsive design
- Deployed using GitHub Pages with custom domain and SEO optimization

EXPERIENCE & COMPETENCIES

Software & Hardware Debugging

- Hands-on experience diagnosing and resolving both software and hardware issues with strong root cause analysis
- Independently resolved real-world system issues without external assistance

Linux System Administration

- Configured and maintained Linux environments across Ubuntu and Fedora including kernel tweaks and GNOME customization
- Proficient in shell scripting, system-level optimization, and desktop environment configuration

API Integration & Automation

- Built projects integrating third-party APIs for real-time data, notifications, and automation workflows
- Developed automation scripts using Python and Bash for system tasks and workflows

SOFT SKILLS

Communication | Adaptability | Curiosity | Persistence | Independent Learning | Problem Solving

LANGUAGES

English (Proficient) | Tamil (Native) | German (Basic)
